## New moves to gag free press

The Monitor's view

coocern at efforts to place restrictions on have a monopoly on news handling, and that the tree flow of news. The trend is now visible they use it to foster such alms as "imperialemong "third-world" and Latin-American na- Isni" and "neocolonialism." India's Prime Mintions, some of whom claim that reports on de- later set the tone when she told the meeting velopments in their countries are blased or distorted by international news agencies and time to depict the governmenta of their erstwhile this should be supplanted by accurate information coming directly and exclusively from the as yearning for the good old days." Leaders

atantly evident to anyone who favors uninpeded, impartial circulotion of information. Governments are notoriously auxious to keep their own shorteomings from coming to light and to put the very best interpretation on their own doings. One of the services of a free press is to get behind such staries and lerrot out the facts - or the other side, if one exists. So the trond needs end is receiving corelul attention from nowamen and concorned organizations such as Freedom liouse and the Anti-Defantstion League of B'nal B'rith.

But developing landa already are hard at work to changa the llow ol news. In New Delhl this month 58 of them agreed to form a pool of their own press agencice, most of them govornment-owned or controlled, to substitute for foreign-controlled agancies and to give on official vorsion of the news. The objective, they said, was to "liberate information and moaa media from the colonial legacy."

who uphold national interests, she added, are The pitfalls of such reosoning ought to be in-

ronceivable way." Airs. Gandhi has seen to it that her own country's once outspoken press now is rigorously controlled. Similarly, at a UNESCO conference lor Latin-American nations just roncluding in San

Jose, Costa Rica, the Intent was to lorm mase communications policies, but many of the papera prepared for aubmission were critical of foreign agoncies or advocated restrictions on loreign correspondents or nationalization of the local press. Correspondents in Alrics and elsewhere already ore linding it dilficult to obtain visas, to move about countries visited, or to obtain access to officials or other sources.

The right of individual countries to improve news handling, if they can, is unchailenged. Bul no one in the free world can welcome auch an effort if it actually is merely a Trojan horee for installing a restrictive, Marxisi-styla approach to journalism. The saddest thing is that without s reasonably free press the developing nationa deprive themselves of a much-needed This latter phrase is a favorilo in naitona watchdog on corruption and other abuses of which contend that the Western powers, in-

## Greetings from Mars!

And our preoccupation with earthbound problems it is well to stretch our vision by reminding ourselves of the axpansive universe around and of man's capacity to discover and explore it. The landing of Viking I oo Mars helps us do just this. It is a thrilling tribute to man'a intelligence, detarmination, and pioneer-

For a layman the technological prowess the Viking mission represents beggles the mind. The unmanned spacecraft last Florida a long 11 months ago. It traveled more than 200 milition miles, soaring through space to its rendezvous with a planat half the size of Earth. When it arrived it had to search three times for a sullable landing alte. Now it will be busy photographing, scooping soll and performing other scientific tasks — all at the push-button orders of man back home, A marvei indeed i

Coincidentally the American landing on Mars comes aaven years after the day man walked on the moon for the first tima. Since then public enihusiasm for space, exploration has waned. The moon landings became routino and torrestrini demands overshadowed the reach nutward. Monoy, It was argued, ought to be spent on rabuilding cities, curbing crime,

end contribute to sociaty's well-being and prog-ress. As for the coat, the \$1 billion Viking program is a tiny lraction of sume apent in Viet-

Moreover, as a grant powar the United States cannot permit itself to fall behind in the development of technological akilis. Not if it wants to keep its primacy in the world. Eveo now the Russians hava a manned space isboratory orbiting the earth; and last October they made a coft landing on Venus, comething the U.S. has not yet tried. Looking ahead, there la Irish terrorism little doubt the Soviet Union is eager to laod the first man on Mars.

But for the momant mankind will watch fsecinated to see what the robot on the Red Planet turns up. The key question of its mission is whether or not there is organic life on Mars, a discovery which would have enormous to withdraw from Northern Ireland. At any Cosgrave to do even more about cooler rate, this and other solve of the life of Cosgrave to do even more about coolers. Mars, a discovery which would bave enormous rate, this and other acts of terrorism have a terrorist activity. Ha already has epoked terrorist activity. Ha already has epoked terrorist activity. ## London and Dublin close ranks

By Francis Henny Special to The Christian Science Monitor

Britate has taken the minder of its analossador to Unblin, Christopher Ewart-Blegs, with elemented teeth. Though appalled, London is deternaned not be be panicked into blad and luttle reprisals upon the government of the Republic of treland.

Indeed, current calculations by British Intelligence assessors are that a major purpose of the assassination was to precipitate such reprisals. It would have suited the Provisional 1RA very well if Britain had broken oll relations with the Republic just as the two governments were beginning to coordinate nutl-terrorist measures

Seen from London, the reactions of the Duhlin authorities have been more than proper, as has been acknowledged by the ambassador's widow among others. The Irish Times pointed out, in an editorial, the killing of an ambassador violates one of the most ancient uf taboos. The object of this tubec upon harming diplomatic representatives, even of the most objectionable states, is to preserve the communications without which nations can unly resort to violence. But these are precisely what the Provisional IRA wishes to destroy: It has no use for any kind of oegotiation; it seeks only unronditional surrender.

The type of under-the-road culvert mine used by the killer squad is one familiar to the British Army from the South Armagh "Murder Triangle" in Northarn Ireland. This suggests to British intelligence sources that the Provisionala feel toey are getting nowhere in the North, ish diplomata to continue to function have failed to make and impact in England, and so have been forced to a labis country. turn to what was stways their diffinate target — the government of the ... #### Gold prices fall

#### 'We will not devalue rand,' says S. Africa

By Homphray Tyler Special to The Christian Science Monitor

Badly hit by the low prica of gold, the South African Government bas chosen to pull in its . belt fineocially even if it harts rethar than to devalue the national currency, the rend.

South Africa is the world's biggest gold producer. Since last August, the drop in the price ol the metal has probably coat the country more than \$500 million in foreign oarnings.

There was serious concern July 20 when that prico dropped for a whila below \$110 an ounce. Apart from the loss of earnings, a continuing price much below this would threaten many of the country's mines because it would no longor be profitable for them to produce. The result would be serious unemptoyment and a dangerous blow to the whole economy.

To make matters worse for the mining industry, there have also been threats of a strike by the country's white gold-miners.

The fall in the gold prica comes at a tima cline in the inflow of loreign capital.

## FOCUS

### Blue jeans in Hanoi

By Danial Southerland

Itong Kong flanol, the capital of communist Vletnam, is the last place you would expect to find blue jeans or taped American rock music.

But according to recent visitors to Hanoi, such signs of "decadent American culture" have turned up frequently enough in the postwar period to have the sutherities wor-

Scveral weeks ago they began erecting posters with illustretions showing the people of Hanol how to dress properly and not in the "hipple" style that caught on in Saigon, the former capital of the South.

"They're terrified of the Influence of Salgon," remarked a toreign resident of Henol. A limited black market in tepe cessettes nf American end other Western-style music thrives In Hanol, and a shortege of freah cassettes has ied to e number of thefta from foreigners living to the city.

Easing of tensiona

All lhis seems to be part of en understandeble casing of tensions and disciptine following three decades of almost conslont warfare, first against the Jepecese, then the French, and finally the Americans.

When the fighting at last ended more then a year ago, the people of North Viet-nam showed e marked hunger for the consumer goods that the capitelistic South could provide. Soldiers and cadres serving in the South brought home sunglesses, wrist watches, plastic dolls, cotorful elothing, television sets, motorbikes, and French-and Jepaneso-made bicycles assembled in Sel-

In the early stages, e Japanese-made motorbike brought up from the South was capable of drewing e sizable crowd of onlookers in lianol. Now such flashy vehicles have become a tairly common sight.

**Noisy Soviets** 

But the North Vietnamese who are attracted to the "depreved" American-style culture of Saigon remain in a relatively small and controlleble minority. For one thing, few people can efford tape recorders or fashionable clothes. And a puritenical streak still runs strong in the people of the

This puritanism is revealed in the attitude of some North Vielnamese toward the Soviets working in Vietnam or visiting as

lourists. The Soviets have displayed a likin for noisy late-night parties enlivened American music. So while the North Viet. namese officially refer to them as "broth ers," they sometimes are beard privately accusing them of "behaving worse that the

The reel disciplinery problem for g bosses of newly unified Vietnam is not likely to be found in the North but in the South, where the American influence has been strong enough to cause some Vietnam ese from the North to think that they are visiting a foreign country when they errive

Nayan Chanda, a correspondent for the Far Eastern Economic Review, reported from South Vietnam recently that thou sands of soldlers and cadres from North Vielnem have been "awed" by the "foreign civilization" that has confronted them is Salgon. At least a few have succumbed the templations of that city of sin.

"It is not only the outword signs o prosperity - big mansions, air-condilioned theaters, ears, television, Honda molec cycles, and, of course, Coca-Cole - which hes made the 'liberators' feel like stran ers, but also the life-style of the Salgones, which is a far ery from the austerity of

"Indeed, it is this confrontation of class zetion that is cousing the authorities and their biggest headaches: the integration is Vieinamese halling from two different cal-

## The making of a mercenary

By Francis Renny

"tt ill becomes British politicians to sneer at white marcenaries for Africa, when the British themselves ere still hiring yellow merceneries — the gurkhas of Nepal — to guard Buckingham Palece and Hong Kong."

Tha speaker was en American, ao ex-officer of the Green Berets with service in Vietnam, who was slitting in New York seriously contempisting offering his services to Isn Smith's Rhodesia. It was one last chence, he argued, to "put some sendbags in the dike that's holding back communism, till folks realisa what's happening to our civilisation."

Of the various merceoaries this reporter has met, the Americans slways seem to be the most ideelistic. Some few British volunteers are openly recist ant talk ebout "gaiting our own back on the blacks for the way liney've kicked us around," but most of them see the business of being a merceoery in largely non-

Their femily ties are loose, they look upon themselves as professiional soldiers, thay onjoy the life end they go where tha fighting is. Not, they say, that there is usually much shooting and killing to be done. The image of tho mercenary as e modern-day Hun, looting, plilaging end reping all day and avery day, does not match the fects. "You spend most lime in airporte and buses," I was told.

Mercenaries ere aimost invariably recent ex-regular soldiers. Men who heve been soft- scription. ened by years of civilian life grumble too much about the nelays and conditions. In fact pilots et home and don't see the point of getting hot ond sweaty in Asia or Africa,

On the infantry side, men with experience of training and loading colonial troops are worth their weight in gold; but they are either get ting elderly, or they are already employed legitimataly in the Gulf atates, Oman and two or three other British aided principalities. "Just To address below.

One year \$25, six months \$12.50. another example of British hypocrisy. asys the Green Beret.

France never lalt ashamed of her Foreign Legion, and most of the major nations of Europe have cheerfully employed foreigners to fight for them Several of them would never have been liberated without mercanaries, while for others the export of fighting mer was a major source of income. The Swedes, the Swiss, the Scots and Irish tought more often under others than they did under their

## Working for a better Ireland

By Alf McCreery Written for The Christian Science Monttor

At a ceremony in Coleraine, County Londonderry, there was a lirm reminder that another side of the violent Northern Ireland tragedy hes to be tuld. This is the story of men end women of all religions who ere working steadlly for reconcilietion at gress-roots level, despito all the difficulties.

Such a man is the Reverend Ray Davey, the leader of the Corrymeela Community, who has just got an honomry Doctor of Letters degree from the New University of Northern Ireland.

Dr. Davey, a Presbyteriae inthister set out in t965 with uthers (mostly students), to build a reconcillation center near Ballycastle un a rugged and beautitul part of the Northern Ireland coastline, just a few see-miles from Scotlantl. He and his group had visited ather European centers at Taize, France, long, Scotland, and Agapc, Italy end embodied elements from oil three in their uniquely trish operation. The ldca was to foster communication between ell kinds of groups, - between rich poor, teenagers and old people - but this work was overteken by the civil conflict in 1969.

Instead of theorising ebout Christianity, the Corrymeela Community acted. It opened its doors to Roman Cetholice and Protestante during the worst of the rioting, it organized family weeks where groups from both sides of the divide could meet (some for the first time), it organized conferencee, seminars and discussion groups for key figures (politicians, community workers and those with some influence on the para-militeries) to try to work out some practical aids to solving the Irieh

Davey himself who as a prisoner of wer in Germany and Italy during World War II had come to know the need for a sense of community among people uoder duress. It seemed natural that he would develop those ideas of Paolo Yashvili (executed in 1937) or tha t00,000 | community as the Presbyterian chaptain at Queens University, Belfsst, and later still as director of the Corrymeeia Community.

A student from this region - one who grew As part of the Coventry Cross of Nails network, Chrrymeela has links with other centers in Norway, Peru, Hong Kong, Jordan, Canads, Russia, Australie Sweden, India, Singapora and New Zealend. These centres, as well as lise friends of Coveotry Cathedrei, helped to for steff and outside groups at Corrymeela.

This was opened lest May, and at the ceremony Corrymeela gave £500 to the Calcutte Cross of Nalle canter, a practical exampla of sharing and concern. (Each center is awarded a "Cross of Natis" for its work of reconcilla-

The work of Corrymeola is a reminder that reconciliation is not just an Irish, but a worldwide need. However, it is on its achievements in Ireland that Corrymeela is to be judged. It has nearly 3,000 people working in their own ways to foster reconciliation, it has inspired the formation of permanent groups to deal with the thorny problems of mixed marriagee The Iriah Government may econ prova how and housing, it gives thousands who pass deep its commitment is to full cooperation | through its doors overy year a glimpse of what

By Dovid Willey Special to The Chrislian Science Monitor

A amail flotilia of luxury yachts belonging to wealthy Italians has scattered across the Mediterranean to ports in France, Spain, Greece, and Malia after the seizure by Italian cuatoms police of more than 150 vessels registered under foreign flags of convenience.

The zeal of police and magistrates in preseculing offenders against Italy's lax and maritime laws has led to a state of near disaster in the tourist industry in many yacht harbors.

Yacht marinaa designed to hold hundreds of lexury vessels are almost emply and resiaurant and holel owners and traders supplying seaborne vacationers are complaining of a drop in trade of ovor 76 percent after the mass axodus by yacht owners anxious not to find their expensive investments in the hands of the

#### New marina

The picturesque Italian Riviera port of Portolino is almost descried at what should be the height of the summer vacation seasoe. Normally the tiny harbor is crammed with expensive Hallan and foreign yachts sailing under the Panamanian flag.

Adolfo Sarti, Tourisi Minister in the outgoing Italian Government, recently opened one of Italy's most modern yacht marinas on the coast of Sardinia. The marina complex has been built by the Aga Khan at a cost of mil-

for the biggest luxury yachts with fresh water, electricity, telephone, and television all piped to the quayside. The lavishly designed marins is almost enipty as the message bas got around the International yschling grapevine that vcssels are liable to unaccountable selzure in Ital-

Mr. Sarti suggested in his speech at the opening of the Aga Khan's marina that the judielal authoritica might turn a blind eye to tax evasion by the yachting fraternity in the light of the catastrophic situation now affecting the entire service industry for yachts - from repair yards to hotels and restaurants.

This brought an angry reply from Villo Santa, the public prosecutor in Cagliari, the main elty in Sardinia, who was one of those chiefly reaponable for the recent spote of judiclai seizures of yachts. "The minister might not be aware that most Italian yacht owners spend their holidaya abroad and are illagal exporters of currency," he said.

#### Stiff penalties

Owners of yachts confiscated by the police face not only the loss of their valuable craft but also finea and imprisoament for flouting Italy's lax laws. According to Mr. Villa Santa they have been evading value-added tax which can amount to \$50,000 on a craft costing \$120,000. Yacht owners sailing under the Panamanian flag also have been avoiding paying an annual navigation tax and duty on liquor and cigarettes.

While the law has been clamping down on lions of dollars and can offer almost 500 berths the aummer vacalions of the idle rich, it also

Asked If BPA would become a political urganization. Mr. Buthelezt told this reporter, "I

But whether the government will allow the BPA or any outspuken political organization much scope is questionable. So far the government has given only tuken concessions in the view of blacks - electricity for Soweto, a promise that the Afrikaans language will not have to be used in teaching mathematics and social studies, removal of a couple of ofticials said to have exacerbated the riots, and grant-Ing of limited powers to the Urban Bantu Counclis, which are only advisory anyway.

Many people, black and white (although cally), think this is not enough. A concrete step late. Maybe it is too late."

must be taken to show that aparticle is being dismantled ... not overthrown ... but diaminited, says Or. Beyers Naude of the Christian Institute.

By Gordon N. Converse, chief photographs

Meanwhile, 22,000 people are watting for houses in Soweto. They are jammed in with others, and when they finally do get houses they can never own the land they are on. Also, many families in the townships are

mother families (without men). These familles, with a very few exceptions, are not allowed houses. Thousand of old people have no families, nowhere to go. All of this could lead to another and bigger

explosion, if not solved.

And it makes understandable the Anglican Rev. Desmond Tutu's plea during the riots: "Oh God, please, please help us. Oh, please some whites ore afraid to speak oul publi- make the white people hear us. Before it is too

## England's topsy-turvy court cases harm pupils replacing selective secondary schools - called lower their educational standards in order to

The Christian Science Monitor

A local council has won a court case against the central government on a deeply felt ques-Iton of democratic principle: the parents' right to choose the education they want for their

The victory, however, may be short-lived and poses a further question: How effectively can a democratic system function when, with each election-induced change of government, policies as fundamental to children's welfare as their education suffer 180-degree turns?

in this senso, Tameside Council'a victory over the central government is a microcosm of a basic dilemma that Britain's two major parties — the Conservatives and the Labourites must some day tackle in common.

The background to the dispute between Tameside, a suburb of Manchester, and Education Minister Fred Mulley is as follows: Tha

The special census figures in recently-passed

cent of the population.

stretching back to Henry VIII or Edward VI with comprehensive achoois. Only children considered capable of going on to university are live advocates for keeping grammar schools selected for grammar achoola. Comprehensivea, as their nama indicatea, accept all children, although within a particular comprehensive some children may be "streamcd" for universities, others for careers of various

The policy per so is not a political issue be-Among Conservatives, as among Labourites, there are passionate advocatas of oach syatam: the advocatas of comprehanalya schooling oftan saying that this is the only way to set Britain. Advocates of grammer schools maintain that class does not enter into the picture at all: grammar schools are the traditional route for bright children from poor or Labour government has long had a policy of cation ladder, and should not be forced to

grammar, schools and often with histories accommodate pupils who prefer a vacallumicareer-oriented schuul.

Unqueallonably, there are more Conservathan there are among Labourites. Successive Labour governments have indicated their deternunation gradually in abolish graininin schools and to replace them with a uniform comprehenalve achool system. (Private achools, so far, are not offected:

the great ac-called "public schools" like Etau tween the Conservative and Labour Pariles, and Wcalminister conlinua to provide the university-oriented and olitist education they have always offered for those able to afford it.)

Bul Consarvative Party has dquarters insists that the quarrel is not with comprehensives as break down class barriers that have so long beright to compel an unwilling local council to close its grammar achools and go completely

Saven local councils throughout England dominated by Consorvatives still refuse to go

Transide, where faibouriles were in poformulated plans to go comprehensive were upproved by the Education Ministry .

Then on May 25 this your, Conservative wan the kernl election after specifically curpaigning for the relention of grammar school The new council immediately revorsed the cision of its predecessor, announced that in grammar schools were to be retsined, and & vitral parents to apply for places therein Eight fundred parenta responded for 240 systable places

At this point, the Education Ministry intervened. Mr. Mullay ordered Tameside lo co. tinue with original plans to go comprehensive, on the ground that these plans were already far advanced that lo change them now would be "ingreasonable" and harmful to the children involved.

The couocil appealed to the courts. It was defeated in a lower court, but was unexperedly vindicated by the Court of Appeals

## Black voices: how far up the ladder are they heard?

By June Goodwin Staff correspondent of The Christian Scianca Monitor

"You navar really know what they are thinking; they navar

The young white South African was defenatve about the while-black issue in his country. He and his girl frend, who was afraid to indicate the slightest political peeve, were eating waffics with honey and cream st Melke's Kitchen, a chain of Johannesiurg restaurants with pessant gingham decor and good food.

The man's contacts with blacks consisted of a coupic of elerks at his office, ha said. Ha had naver met a universityeducsied black, although sbout 500 get degreca every year. In the wsko of Juna'a dsysstating riots in Soweto and in

other black townships he thought the blacks should be given no His opinions are common - partly because oportheid, as the

system of soparation of the races is called, has worked ao well, and partly that for most white South Africons there is ofmost no inesaingful contact with blacks.

andra, the black township that is smack next to Johannesburg's rioh Dallas-styla northern suburbs: Whites ignorant of blacks

been into Soweto, 12 miles away, or into the more diamal Alex-

#### Whites quite genuinely do not know what blacks in thair own

country are thinking. This reporter often found hersalf telling interested whitea whal blacks had told her.

The most common point of contact is the master-servant relationship. Other channels for communication are individual churches, the South African Council of Churches (SACC), the Christian institute, the institute of Rnca Relations, and government officials administering black townships.

Msny government officials seam unsympathatic to black problema, but the other organizations and some individuals ara in touch with what blacks are saying. The problem is whether this information geta through the bureaucracy to the decialonmakers at the top.

"No one in the government has asked me what the blacks are saying," said Boyers Naude of the Christian Instituto, a mon who is trusted by the blacks. He and John Reos of the

SACC were warned to dissociate themselves from lownship ac tivitles during the riots.

"That shows the government doesn't Ihink blacks can do something on their own. They always think thore are while instigators," Dr. Naude aald.

#### Responsible leaders

But he says there are responsible government leaders who are concerned about what the riots maan.

A number of Afrikaners are afraid to apeak out against the system. "They will think we are communiats," said one Afrikaner in local government. He added, "Don't use my name." The Afrikanor press has been far ahead of the government

(which some people would argue is not far) in demanding some kind of chango. A faw Afrikaners express concarn the press may get squashed, but in the next breath they add the alectorate must be educated for change by the press.

The Nationalist Party government of Prime Minister John Vorstar is secretive enough that few people know what it is planning. Mr. Vorster is trying to jugglo between the hard-line whites and the need to avoid onother black explosion.

A while backlash after the Soweto riots is evident in anger that the blacks destroyed so much government property paid

"What the outside world does not realize is that to percent of South Africa's population is carrying the rest on its back," said Rendin Dippenaar, a member of a racently formad Afrikaner women's organization called Kontock, which aims at increasing ties with blacks.

#### Gold price falls

The drastic fall in the world price of gold could be o strong factor in forcing the while government to modify aparthcid. The wenker the South African economy becomes, the higher the unemployment; and the more trouble from blacka.

There has been talk among some Afrikoners that the lownships slinuld be made into city-stoles and blacks given the right to govern tham. But there is a simultaneous recognition that that would not be enough.

June's urban riots came sooner than most white South Africans had expected, although the country was well warned. This has whites wondering if worse is going to happen soon.

: One Afrikuner official in local government who has confact with blacks and is sympathotic to their problems hos taken to earrying a revolver since the riots. "My friends and I are stocked up with petrol and food, just in case," this official added.

Whites who see the problems do not know an answer, but they seem willing to be led by anyone with a plan. Other whites do not see the problem and "cannot even tinug-

ino what it is like to be black," suld an Afrikaner woman. She added: "A black mother in Alexandra said the other week. You give up your sons to go and fight on the border lin South-West Africal but we lose our sons too. They go to Irain to be terrorists."

A conversation of that kind is a rare event in South Africa.

# Austria: hedging on minority rights?

Special correspondent of The Christian Science Monitor Austria's alleged evasion of the treaty to the For example, there have been few difficul-The Yugoslavs have lodged another protest

with Austria over its pending special census of Austria's long delay in defining mi the Slovene minority in southern Austria. They condemn the proposed census as tantamount to moving to revise the state treaty concluded between the wartima allied powers (the United States, Britain, France, and the So-

viet Union) to end the occupation of Austria and restore Austrian independence in 1955.

The treaty guarantees billingual and other minority rights in education and local administration for approximately 40,000 Slovenes in The position of the minority is fully and ade-Austrian Carinthla (just over the border from bere) and about 25,600 Croats in eastern

## Jobs: cheery news for some

By Harry B. Etlis Staff correspondent of The Christian Science Monitor

from the deepest recession since the 1930s providing jobs for a growing American work

Surprisingly well, meny experts agree, cxcept where young Americans are concerned. Consider these fects:

• The U.S. labor force, reports the Departmeet of Lebor - the total of men, women, end tcen-agers seeking jobs - hes grown by 2.1 million in the lest year.

· Yet unemployment, though still very high, has dropped from 8.9 percent in the spring of 1975 to 7.5 percent of the work force today.

The economy, in other words, is absorbing enough people to pull down the jobless rate, as well as provide for newcomers flooding in the labor merket.

Darkest blot on the economy is the inebility of many young Americans, fresh out of school, to find jobs. Nearly one out of fivo teen-agers

Block toen-agers ere in the worst apot. About 40 percent of young black men and women - two out of five - cannol find work. These people, experts say, benefit least from

a U.S. economy which, more end more, demands some kind of Ireined skill.

At least three prominent ecocomists - Albert Sommers of the Conference Board, and Bernard Anderson and Micheel Wachter of the Wharton School — are analyzing unemployment oblems and what might be done about them for Democretic presidentiel cendidate Jimmy

President Ford's major initiative in this field - an effort to reduce the minimum wage for teen-egers - is stymied by the joint opposition of the AFL-CIO and a Democretic-controlled

the world of work with the same needs as

Ford edministration officiois argue that a lower minimum wage for teen-agers might in-Washington duce employers to hire them for bottom-rung How well is the U.S. economy - emerging jobs, from which they could begin to climb the

> Some experts point to the fellure of Amerlean schools to furnish young people with mer-ketable akilis. West Germany, they note, hes a youth unemployment rate of 3.6 percent, because the majority of young Germans go to some form of trede achool.

"Why not," suggests e prominent New York banker, "beve an architecturei student learn carpentry along the wey?"

A majority of young Americans do not go to college. But traditional American high schools, geared to college preparation, provide limited opportunity to learn menual trades, at least to the extent demanded by the marketplace.

Meanwhile, says the U.S. Labor Department, "the youth labor force — ages 16 to 24 — is expected to reach 25.8 million by July, 1976, about 600,000 greater than in July, 1975."

By 1980, occording to lebor snalysis, "postwar bobios" will have emerged fully onto the lobor scene and the youlh lebor force — ea a percentage of the total U.S. work force -

On the bright side, reports Manufacturers llanover Trust, the U.S. economy oow is putting people back to work at e faster pece then after eli but one of the postwar recessions.

Looked et another way, the U.S. has a higher "employment ratio" - percentage of working-age people ectually holding jobs then some other major industriel democreciea, including West Germeny and France.

Yet the latter nations have lower unemployment rates than in the United Stetes. How is this possible? Beceuse, experts say, more American women enter the labor force than in most Europeeo countries.

Mr. Carter also opposes lowering the min; show up either as part of the "employmeni raimum wage for teco agera. He seys they often tio" or as unemployed because they do oot
are not part of a family alructure and enter - seek jobs outside the home. Fewer Europeen women, in other words,

## Inflation still tugs at America's purse

Staff correspondent of

Even though infillers of Americans are continuing to fall behind in their hattle in keep up with sleadily rising prices, the lutest government figures on inflation show some bright rays on the nation's coonomic horizon.

With inflation now running at about 8 percent annually, families need to hoost their income by an equal percentage to stay even in the race.

For lower-income Americans even a 6 percent Income hike is not enough, since the sharpest inflation rate is in necessities - gasoline, fuel oil, electricity, some foods, clothing, medical and hospital costs, and home repairs.

Thus, reports the U.S. Department of Labor the average factory workers sow their gross earnings in June drop by I percent because of inflation and slightly shorter weekly hours at

llowever, despite the lact that gross wackly earnings for factory workers daclined in June. With gold effectively divorced from the world's left after taxes and inflation — continues to increase over the long haul.

In the April-June quarter real disposable income grew at about a 4.1 percent annual rate, somewhat below the 5.3 percent pace in the lirst quarter of the year.

In June, says the Labor Department, consumer prices rose 0.5 percent (6 percent at an annual rate), paced by a startling 1.9 percent jump in chergy prices.

flost of a gation of gasoline rose more than 1.5 cents tast month, as American drivers - ignoring cunservation and in many cases speed thutt pleas — burn up fuel at a record pace.

This in turn requires more oil to be imported and foreign oil costs more than domestic citide. With a resurgent U.S. economy demanding more energy, experis agree that oil imports will continue to grow - thrusting energy prices on an upward spiral.

Consumors, at least, should not be hurt and in the purchase of jewelry and dantal work even helped - by a speciacular drop in the price of gold, which on world markels has deelined almost 12 percent last week.

An ounce of gold, which cost nearly \$200 at monetary system, this drop does not cause havoc in paper currency values, which no longer are pegged to gold.

## Protecting the president

By Clayton Jones Staff correspondant of The Christian Science Monitor

Washington How to sateguard a U.S. president without surrounding the White House with electronic weaponry and guards trained to kill?

The question remains unresolved for tha U.S. Secret Service.

The latest intruder onto the White House lawn - the fifth since 1974 - was shot fatally July 25 by one of the mension's guards after the man acaled the iron fence and brandished a three-fool metal pipe.

Electronic sensors - designed for military use in the Vietnam war - dalected the man immediately iriggaring flood lights and a chase by an Executive Protective Service (EPS) offi-

President and Mra. Ford, unaware of tha nighitime incident until lator, were on the second floor of the White House.

President Ford said ha did not think tha guard ovarreacted. A Whila House spokesman said Mr. Ford felt "Tha policeman hod a responsibility to protect the Whita House and life President and that the policemen did his duty in accordance with his beat judgemant."

Whether Pvt. Charles A. Garland, who joined the EPS in January, should bave fired a shot at Chester M. Plummar, a Washington cab driver, has been challanged by civil liber-

Federal fireorms policy calls for officers to

last resort" wheo the officer believes there is danger of losa of lifa or serious bodily injury to himself or another person.

A Secret Service spokesman, responding to a query If the shooting would cause any changes in White House security procedures, said, "We onstantly review our security procedures and find no problems with the outer perimater at

"The government ought to look at its polley," said Ralph Temple, legal director of tha American Civil Libertics Union. "More careful work and methods could have prevented this incident," he added

in February, 1974, White House guards fired ot an Army helicopter commandeered by a dis-gruotled soldier which attempted to land on the White Housa lawn. On Christmas day, 1974, Marshall H. Fields of Silvor Springs, Maryland, crashed the Whila House gates and held police at bay for four hours with fake explosives. And on June 5 this year, another Washington man climbed the six-foot-high fence in his third attempt at unauthorized entry.

The July 25 shooting was the first fatal incident since an attampt on President Truman's life in 1950 near the Whita House. Il was "noi in error," said Secret Servica spokesmao Ron

Among its weapoory, the Sacret Service recentlý has oblained a Redeya anti-aircraft misslia that can be fired from tha shouldar, according to Aviation Week magazine, to fand off further air attacka. In May, wrought-iroo gates shoot their guna with "intent to make in- were replaced with \$550,000 worth of solid capable of continuing the activities" only "as o steal, crashproof gates.

## Alaskan oil to flow by mid-1977 if pipeline passes inspection

By Clayton Jones Staff correspondent of The Christian Selence Monllor

Washington Alaskan oil could be flowing in the lower 48 states this time next year - if federal inspectors are convineed that pipeline welding Haws will not split it on the ground first.

Concern lo Congress and in two federal agencies has brought new, thugh inspection standards for trans-Alaskan pipeline builders even Ibough 580 miles of the 800-mile pipcline are already underground or complete.

Of 30,000 welds linking segments of the 48inch plpeline from Prudhoe Bay to Valdez, 1,755 welds do not meet industry standards. And another 200 lack records showing X-ray inspection, according to the U.S. Dapartment of

But to dig up and reweld those sectiona would add \$55 million to the \$7.7 billion project - largest private construction operation aver and more delay.

Over a million barrels of oll a day should be flowing by next mld-July – which is four weeks bahind schedule, according to Edward Patton, chairman of Alyeska Pipaline Service Company. All walds are axpected to be linished by

A pipeiina break caused by aven a hairline crack bursting the pipa could spill 830 barrels a minule onto the frozen Arctic tundra.

Officials say detaction devices should shutdown the oil flow in uoder 10 minutes. Maxlmum oil spillage would be 15,000 to 50,000 bar-

A federal task force sent to Alaska by President Ford to assess tha pipeline problam returned two weeks ago. And an outside auditing firm, Arthur Andersen & Co., was hired by the Department of Interior to inspect the weiding X-ray records which are under auspicion.

As a result, the Departments of Interior and Transportation are forcing Alyeska to prova each weld meets industry atandards and to claan up their X-ray Inspection records ao thot welding can be monitored dally.

Sloppy welding?

Committees expressed skepticism in Alyeske's welding proceduras, calling he "sloppy," and are conducting hearings to a sure full compliance with the 1973 Trans is kan Pipelina Act.

"There is real doubt as to whether alyet can - or is willing to - meet those [the lev, slondords," said Son. J. Bennatt Johnston of Louisiana.

Alyesko's Chairmeo Patien said 231 3,955 wolds with problems already have repaired and the remaining welds would it Mambers of the Senate and House interior provent emplotion of the pipeline.

## Malaysia uses jungle tribe to fight Communists

Special to The Christian Selence Monitor

Perak State, Meleysta in its struggle against troublesome Commu-

nist guerrillas, the Mnlsysian Government has calisted the help of a primitive and long-negiceted jungle tribe, the last such people in the

Here in the State of Perak, one of the most acute trouble spois in the entire Federation of Malaysia, the antigovernment guerrillas have been mounting a growing number of successes in recent months. But the guerrillas may soon find the going more difficult because of the Orang Asil, sboriginal iribesmee who still dress in loincloths and use blowpipes as their main weapons. They are superb guides and trackers who know the west Malaysian jungle and its ways perhaps bettar than anyono else. It is in the jungic that the Communists have found sanctuary and have made gains that normal security precautions have not been able to

#### Support wooed

The Orang Asli are relatively few in number there are perhaps 150,000 of them out of a lotal Malaysian population of 12 million — and are scattered across the almost impenatrable ; jungle areas of Perak, Pehang, and the northaastern State of Kelantan. They had, until recently, little knowledge of the outside world and their lives were untouched by the developments that bava made this a modern coun-

The rapid growth of Malaysia, howevar, has begun to encroach oo the forest presarvas and

support is actively being woned by the government and, as one observer of the Malaysian scene puts II, they have "been raised from sec-

ind-class citizens." The government has stepped in to try "to bring them rapidly into the modern world" in the words of one official. It is a delicate prob-

To both improve the lot of these people and io lako advantage of their jungle skille, the government is providing them with more and more innovations and services. Medical doctors are being flown in to staff more than 100 health clinica in remote areas. Education is being provided on a wider scale than ever before. Thera is to be en altempt to stabilize their agriculture by providing them with special lands on which to grow regular crops that should yield long-tarm incomes.

#### Resettlement erea

The government also is building a naw rescittlement srea for 1,200 Orsng Asil and their families here in Parak at a cost of \$8 million. It is hoped that this will act as a first line of defense against the spreading Communist

Furthermore, the government has decided to replace the blowpipes of the Orang Asil with guns. As many as 50,000 of them are to be trained in military tactice and in the use of modorn waapons.

But at the same time the government is csreful not to go too fast in its deslings with the Orang Asli, recognizing that they could be ust ss useful to the Communists and dengarous as an enemy. Little affort is being uniqua way of life of the Oreng Asil. Now their falson falson on them the official religion

stitutional amendment committee chaired by dian society needed to be disciplined. lormer Defense Minister Swaran Singh has These observers suggest that the proposals proposed eight "fundsmental" duties for every for respecting the Constitution and democratic

Those dulles would include: defending the country and rendering national scrvice, including military service, when called upon to do so; respecting and abiding by the Constilution; respecting democratic institutions set up in accordance with the Constitution; abstaining from violence and protecting public property; paying taxes according to law; shunning communslism; assisting and cooperating in implementing directive principles that guide the state's fluties; and upholding the sovrelgity of the country.

The Constitution in its present form prohlpublic purposes. (The Indian Army is presently youngest son, Sanjay, perhaps its chief ab an all-volunteer force). To make sure that everyone carries out the proposed fundamental dulles, the Singh committee also suggests that Parliament pass laws that would punish those who refuse. It further proposes that these laws

not be open to question in the courts. The fundamental duties suggested by the Singh committee, in the view of observers stipulated provisions in the Constitution ... indira Gandhi'a oft-repeated statement that in-

institutions, rejecting violence, and paying taxes seem to be directed at the "polities of agitation" associated with socialist leader Jayaprakash Narayan and others prior to the state of emergency that was imposed in June, 1975, and is still in force.

# Wanted: new markets for apples and pears

Special to The Christian Selence Monitor

Forty years ugo Australia was one of Britaln's largest market gardens. Britain was easily the biggest huyer of all Australian products and in inru supplied most of Aostralia's non-agricultural consumer needs.

Along Tasmania's rich alluvial flats in the Derwent and Hoon valleys the growers lived graciously on the proceeds of a unorkel that labor, enostably rising freight raics, uplicavmost of them never saw, and that even the great depression failed to upset seriously. realignment of exchange rates, and inflation Today II would be described as neocolonialism. but to those days, the arrangement worked ples sold for less on the British market than it

World War fl and the disruption of shipping to Europe tarought much of the live-way traile to no end. Necessities like meat and wheat rao the blockede, but for non-essentials, locluding Tasmanin's apples and penre, thore was nelther demand nor space.

The government paid subsidies to fruitgrowers to tide thom over in the axpectation liat better days would come again. But they

in arrive on the London market just as the European crop was ending, but looproreolents in refrigeration now mean that trust can be kept gnod condition throughout the year. Fruilgrowers in France, and elsewhere, have planted out large new areas under apples and

pears, and the fruit tinds a ready market the

This was the first hig blow to Australian indistry. There have been many more. Cost of als in international trading relationships, the sometimes meant that a case of Anstralian ap-

cust to produce. Despite the growth in the Australian population, production from the orchards in Tasmaola, Victoria, New South Wales, and Western Australia was always far higher than local

Attempts to find marketa in Asia have not been very successful.

The 1972 Fruilgrowing Reconstruction Schome led to the large-scale grubbing up of Orchards planted inimediately after World expensive labor, or to incur heavy bills for and fluon were destroyed.

As a result production of applies in Anstralin decreased from 442,600 tons in 1970-71 to 368,000 tous in 1074-75. Peors, quinees, peaches and nectarines dropped similarly, but still the ontput execeded domestic consumption.

Eftorts to find other uses for pears in, for example, fruit drinks, were thwarted by higher production costs and stiff compelition from

Now fruit farmers must find other ways to harvest a living from their land.

Some growers in Tasmania switched from pears and apples to strawberries and raspberries, but these did not prove aucceasful. Other growers, who produced pears intended for canning, aold them instead in competition as elsewhere, was a family profession, a cal-

Thosa who switched from fruit growing to markat gardening often found that they were ages in so many parts of the world, the fast too far from their marketa, end that long-esmarket needs. Many also found

mechanized equipment at a time when creis was short and interest rates high

So far, fruit-growers in distress bave been promised government assistance until the end of the year through the Fruttgrowing Recostruction Scheme. But so far no action has set been taken on n proposat made by fadusing Assistance Commission. This would set up area redevelopment authorities to superintend the changes needed to establish a smaller, but still viable, fruit Industry.

No doubt something of this nature will even tually be introduced. The Federal government cannot allow long established primary is dustries simply to collapse.

But what has changed forever is the Me style of man on the land. Farming in Australia with fresh fruit suppliers, to the detriment of ing, and many farms had been passed on fine generation to generation.

Yet today in e time of so many food she tablished growing districts were elready aupthe cities. They don't see much future wike

### \*A foreign policy after Kissinger?

ating policies belong to the past, ere ouidated, end that a new approuch is in order.

Public speeches cited

The new ideas are seen most prunmently in the public speeches of both Mr. Carter end Mr. Iteagan. But they are likely to influence the future shape of American policies regerdless of the outcome of the Republican convention and the November elections. The Kissinger era in foreign policy does seem to be approaching its close - with or without Gereld Ford in the White llouse.

Roughly speaking a third phase in post-World War 11 American tureten polley lies Shitt in emphasis ahead. The first, the Acheson-Dniles phase, was aimed at containing the power of the Soviet Union by rebuilding the ecumonoles and the political lives of Western Europe and Japan and by forging a system of alliances with those two important paris of the world.

The second or Kissinger phase made two impuriant autilitions. It reopened American relations with China and twinned that with the ilinlogite or detente with the Soviet Union Detenie, as arriculated by Dr. Kisstoger to his writings before the enterest government, was same time build a substactory buyer-and-seller seen as a passive form of containment, hence - relationship with the raw-material producers preferable to the more negative idea of plain to the south - no one will need to warry about militury and political containment.

positive. The Kissinger phase assumed that the primary danger in the interests of the United States and its triends and allies was, and would cuntinue for long to be, the expansionism of the Soviet Union The new thinking regards this as a diminishing condition. The Soviet Unlan is a great military power. But its ecomunic base is narrow and shaky and its resources limited. It is being contained by many torces in the world, including the restlessness of its own clients and of Cummunist parties notside the reach of its armies

The new thinking seeks to be even more

The new and greater danger is the failure of the United States to come to comfortable and easy terms with the raw-material-producing countries lying to the south of the Industrial democracies. The emphasie to Kissinger policy has been on the East-West relationship. The em-South relationship The key thought is that if the United States can refurbish its reliations with Western Enrope and Japan and at the the Saviet Umen, ii will settle into some side

recent Uolted Nations Security Council debate on the Israeli raid at Entebbe.

Yet there is no doubt about the intensity of Kanya's current feeling against him, sparked by anti-Kenyan acts and ulterances attending his charge that Kenya colluded in the Entebbe awoop. As for Kenya's withbolding of oil, the Kenyans say they will let it through as soon aa Uganda comes up with the hard currency for past and pending deliverica. The Secretary-General of the Organization of Africao Uotty arrived in Nairobl Wednosday to try to mediato in this dispute.

Uganda'a refationa with Britain have been difficult almost ever since Geogral Amia seized power. The final break has come after the outside world. One is I.Ibyao leader (and Ceneral Amin's falture to account for a Briton, fellow Muslim) Col. Muommar al-Qaddafi. But Mrs. Dora Bloch, believed killed after the Enmost other African leaders ore embarrossed tebbe raid end Uganda'a cubsequeot axpulsion by the Ugandan President. Yet when to their of Britain's top representative from the couneyes the Weat seema to be giving vont to anti- try.

## \*Tanaka's arrest

the biggest risks of his political life. As a diplomat in Tokyo put II, "If you can

pick up Tenska, you can pick up any-. there is no one who is safe." And fulure arrests conceivably could lead to politicions allied with Mr. Mikt.

Even if the arrests slop with Mr. Tanaka, the effects ere likely to be far-reaching. The prosecutors' decision to strtke directly at Mr. Tanaka has been likened to their assaulting the summit of Japan's sacred M1. Fufi rather than clans in anticipation of their arrest. As many working their way up the slopes in stages. Party reform

Mr. Tanaka's indictment and the breakup of his political faction would remove a major obstacle to reform of the money-oriented LDP. eithough there are built-in obstacles that have helped make a mockery of Mr. Miki'a promises to reform the party. Other logical results would be greater caution on the part of businessmen in their use of money to influence politicians end o greater offert on the part of the LDP lu give positions of feadership to youngar

men with reputations for honesty. A U.S. Senote subcommittee reveintion lost February that the Lockhaad Aircraft Corporation has spent \$12 million bribing Japanese officials to self its pinnea in Japan plunged this country into politicol turmoil. In March, Yoshio Kodama, an ultre-rightist influence peddler ond friend of a number of leading politlefans, was indicted on charges of tax evasion and violating the foreign exchange control law. Mr. Kodama was Lockheed's secret represenlative and "fixer" in Japan.

Since thao, police have arrested a former managing director and former board chairman mentery justice ministry official, was conas well as four other leading officials of the victed by a district court of taking bribes in a Marubeni Corporation, which was Lockheed's coal mina scandal. A higher court later overageni lo Japao, and six senior officials of All furned the ruling.

their investigations, Mr. Miki was taking one of Nippon Airways, which bought 21 Tristar aircraft from Lockheed. But Mr. Tanaka was the first publician to be arrested.

Tanska charges

Mr. Tanaka was accused by the Tokyo proseculors of receiving from the Marubeni Corporation 500 million yen (\$1.66 million) in brihes over a six-month period during his tenure as prime minister.

For weeks, the Japanese press has staked out the homes of a number of leading politias 10 to 20 cars, with their engines running and in constant radio communication with their home offices, have been involved in all-night vigils. One indication of the surprise with which the Tanaka arreat hif Japan was that no ADELAIDE ono had staked out his residence.

Many Japanese pofitical analysis think that because of his unorthodox background, Mr. Tanaka was a more vulnerable farget than most leading politicians. Unlike the traditional Japanese leaders who went to Tokyo University and worked their way up through the bureaueracy and big-business concerns, Mr. Tanaka is a rough-hown, self-made mnn who never got farther in his formal education than elementary school, ffe mode vast sums of money in the construction business and in real estate tleola. Mony of the more orthodox politicians considered him something of an upstart.

In December, 1974, Mr. Tanaka was foread to resign as prime minister aftar he came unto resign as prime minisfer aftar he came un-der suspleion of evading income laxes and faking advantage of his offical position to enhance his personal fortune.

In 1948, Mr. Tanaka, then a vice-parlia-

LIGHT • KRAPT TELEFON = SONNERIE

t then most politicians in Georgie, or elsewhere, but

Carter has criticized President Ford for his string of

a legislativo branch.

# Garer: what kind of present would he be?

An ective, herd-hitting, herd-working, end often tumultuoue presidency is how some friende end essocietes cherecterize Jimmy Certer's performence if he wine in November. Todey this newspaper's Southern bureau chief reports on the picture emerging from such predictions.

By John Dillin Staff correspondent of The Christian Science Monitor

Jimmy Carter would be a stubborn, herd-working, innovetive president who would fight Congress - or anyone else - who resisted his programs.

This view of e possible Carter presidency emerges from dozens of interviews with Georgie politiciens, officiels, friends, end associates who know him well.

"He will be a very ective president," says Lt. Gov. Zell Mtller of Georgia, who worked closely with Mr. Carter in the state Senate and Democretic Perty.

"He is a highly competitive men, a very stubborn man. Wheo he comes up with e program, be'll think it's the best program possible and ... will leave no stone unturned to

Those who know him best sey a Carter presidency would probably include:

• Stormy reistions with Congress as he pushes hard for sweeping programs.

 Reediness to go over the heeds of congressmen and the press directly to the people on controversial issues. Stubbornness and purposefulness that would make him

one of the toughest chief executives in decades.

 A hard-working president who would begin official busioess by 7:15 s.m. end pause only for a sendwich (usuelly plmiento cheese on whole wheat breed) and a soft drink for

Frequent, regular press conferences.

 A small circle of totally dedicated staff members, most of whom have known Mr. Carter for yeers.

 Hesvy demands on White House staffers, including iong hours and high levels of output. The prealdent would not hesitate to fire sluggerds.

· A tendency for Mr. Carter to bury himself in the fob for the first year or two - after which he would trevel,

 Sesthing criticism of pork barrel, meke-work projects, articularly those originating with the U.S. Army Corps of

environmental programa. • A get-rough, bare-bones approach towerd defensa

spending; reduction of the number of generals, admirels. • Extensive use of experts from private industry to help

find solutions to problems like bureaucratic red tapa.

Numerous appointments of blacks (b.high-level posts.

Up-front emphasis on three domestic programs: reorganization (including welfare reform), netlonel health care, and tax reform.

· Heevier than expected emphass on foreign affairs,

where he would bend every effort to strengtheo Man \*This is the plon. This is the way it's going to be. • A desire to leave a record as a decisive profess no time I remember when he hundled it very badly. e ahced with it.

the Herry Trumen mold. Ex-Nevy officer Carter reflects e "submarks on no - there were seven of us there. And we were sit-

immioned all the black legislators down to his office on mender" approach to governing. His hand tightly given his office when the vote came up on the matter he controls. He essumes a "take charge" stance toward the ad, and it falled by the votes that were sitting in his oflators, cabinet members, and burceucrats. If he had a better relationship with the Legislature.

"He's the most determined man I've ever seen," up wouldn't hove happened." Georgie Attorney General Arthur K. Bolton. "Anyone that missed vote took place even though Mr. Certer is underestimetes him is beat before they slart because hin high marks for numerous black oppointments to state work 26 hours a day." 3. He had, says Senator Bond, an overell good record -

we could be proud of - but these problems persisted. As governor, Mr. Carter took advice well, say colleggie Carter style of government takes getting used to. A but be remained his own men - with his own sense del personal friend of Mr. Certer cetts him "odd" - difrection and purpose.

"He wouldn't trade out real principle," says Mr. Bolin "theless e "leader." As governor, Mr. Carter was bitterly resented by marmer Gov. John West of South Carotina says: legislators and ordinary citizens - and some feel that a mmy was always sort of a mayarick in the sense that happen egein if he becomes president. mayer played to the esteblishment.... He elweys to the people rather than the politiciana."

This resentment wee from two sources.

First, Mr. Corter ran a rather consorvetive compared imevarick Certer styla could joit Congress. governor. He woodd George Wallece voters. (It would sel to people been bupossible to win without thom.) And he sounded to Congress resists on important Carter bill, those who pathetic to privote, segregoted schools, saying, for the him say he won't hesitate to appear directly to the ample, on Sopt. 4, 1979: "You cen rost ossured I'll do ent e, thing f can for privoto schoola."

A shock wave swept over Goorgie when newly elected sail, perhaps in committee, Mr. Carter might well Governor Cartor seemed to do an obout-face. In his 1 Air Force One, fly to the senstor's state, and make a

r eddress there emphasizing that their senetor was "I sey to you quito frenkly that the time for racial fing in the wey of progress. crimination is over. . . . No poor, rurol, week, or black printensat Governor Miller seys Mr. Certer "belloves in son should over heve to bear the edditional burden of het over the politicisms' heads and applying the pressure deprived of the opportunity of en education, e job willy to the people who in turn will epply it to the politisimple justice."

Uncompromising stende fact, says one Carter wetcher, "Jimmy would think Mr. Carter then ctimbed on the Georgie Legislature is ongress, the press, and even the bureencrecy to an exa Texes cowboy oo e bronc. Insleed of a nudge here lonly corved to separate him from the people. And he compromise there - like precading governors - he dugit think enything should soperete him from the

Examples of uncompromising stands are numerous.

Certer a refusul to bond to pressure from political his apurs and almost assemed to enjoy the beitle. Once, when Governor Certer wee struggling to passe igues has won him a regutation for being stubborn and aspect of his reorganization pleo in Georgie, sides came appromising - n reputetion that is heard so often, from him with information that a key senator could be seen by sources, that it is prubebly true. their side, The only requirement: the senetor's see had the friend and noviser Charles Kirbo says that if Mr. to be given e reletively insignificant prumution in the high ir is stubborn, it hear't been a handleap in his reletions

immy is stubborn in an intelligent wny - not a self-de-Mr. Certer refused The Governor's inclination was to throw out his entering is supported in an intelligent why — not a self-degrams to the people and the Legislature and say: "I how to have been in the Legislature, compromising is you can go elong with me," says one Georgie official thinks before the Legislature in the line of intelligent why — not a self-degrams to the people and the Legislature of his about of intelligent why — not a self-degrams to the people and the Legislature of his about of intelligent why — not a self-degrams to the people and the Legislature of his about of intelligent why — not a self-degrams to the people and the Legislature of his about of intelligent why — not a self-degrams to the people and the Legislature of his about of intelligent why — not a self-degrams to the people and the Legislature of his about of intelligent why — not a self-degrams to the people and the Legislature of his people and his

way department.

because of his ettitude. It was, 'My way or oo way " ee used way, or not at all.'

"He was the kind of guy who would aummon you down" his office, elmost arrogently, end sey, 'Here it is, This is a dovice to pressure lowinskors. what I've gol. Do this.' And we'd say, "This is e two'w!" principal method of operation along this line was to street — you give and you get.' He didn't like to give." He didn't like to give. He didn't like to give like to

doubt that Mr. Carter would use the veto whenever he thought it would forward his own concepts.

A Carter White House would be filled with people loyel to the commander in chief.

"Ilmmy surrounds himself with people . . . dedicated to him," seys Mr. Kirbo. "But they must elso be dedicated to what he's trying to do. lie explains to them what his goals are, and you have your choice of getting on the wegon, or

Once they climb aboard the wagon, Mr. Carter can be mighty tough with his employees.

"lie'ti ftre you without any problem, but he won't do it in an lahuman way," seys Mr. Kirbo. "And If he'a president, there won't be any of this business of hurting people."

**Eerly worker** 

Early working hours ere a Carter hallmerk, and perheps reflect his fermboy past.

"lie'd often be down at the office at 6:30 in the morning, and some of the staff by 7 to 7:30," seya an associete. "If someone needed to sea him, he'd ssy, 'Have him here at 7:15.' People in state government just started going to work

One of the most controversial ects of Mr. Carter's career as governor indicates possible hard timee ehead for the U.S. Army Corps of Engineers.

Mr. Carter blocked construction of e Corps dam on Georgle's wild end scenic Fling River. The project would heve brought millions of federal dollers to Georgie and mesat jobs for hundreds of people in an economically denrived aree.

But the Governor decided that the ilem was economically unjustified. And it would have been ecologically deetruc-

the Governor's Manslon, and Mr. Corter wrote out his rejection in longhend, which was photocopied and given to reporters the next day.

"Jinuny used to do some of his most dotolled work alone nt night," says Dunne Riner, n formor Certer staffer who now works for Gov. George Busbee.

"Lote at night, after the family hed retired, he would take a stack of papera and go over it in a very datalied way. . . . He probably takes on more detail, reads more reports and memorendums, and responds to that personally than eny exocutivo I've over seen in public office."

:Although some staffers will be pushing for a feat prest dontial beginning. Mr. Carter hes said he would hope to sulmit thorough, courdinated programs in areas like taxes. The plecentral approach is opposed in favor of a complete, ciel and economic apheres.

Despite his easy success at the Democratic convention, great doubts remain in the United States about thie oew face from the South.

Even those who know him best cookede there is only so much one con predict about a man's behavior in the nation's highest office.

Hopefutly, enough will be learned within the coming three months to help voters make a sound judgment.

# VW Rabbit makes the trans-Atlantic jump

By David R. Francis Business end financial editor of The Christian Science Monitor

Wolfsburg, West Germany Volkswagen's top marketing manager, Edger von Schenck. s delighted that his company will start making "Rabbits" in

he United Stotes. A "Rabbit" is the U.S. name for a "Golf." tle hed been urging the move for some years. Now, he says, /W can better "Americanize" its automobiles. He figures the J.S. plant will choose exterior colora and interior finishes heter suited to American lastes. Certainly, the customer will lave a greeler choice of such details since he or she will be the to give a dealer specifications for a car than can then be irdered from the assembly plant without the delay of cross-Al-

Humanity seems to divide roughly then At present, VW is still deep in negotiations for purchase of a middle: Hiose who can't stand week partly completed Chrysler plant et New Stantoo, Pennsylvanio, those who thoroughly enjoy it. I'm sign VW estimates an outlay of around 500 million DM (\$190 milstick my neck out and suggest that his lion). Perhaps two-thirds of this will be finonced in the U.S.

Ideally weeding is an art akin to be the minieturiet; it is bonsal rather than have offered a \$135 million bean at 9 percent interest But the However, I find it is beat to be promited that the beat to be promited by the constraints of the beat to be promited by the constraints of the beat to be promited by the beat t wise for virtually any weed-events Millon Shapp had been busy with the Benneratic Party conspite of whatever diligence, the party vontion. VW ufficials here now hope for a canclusion of the fi-

Wherever the assembly plant is finally located, Mr. von

Since U.S. workers are accustomed to n shorter vacation and fewer holidays than German workers, productivity in the American plant should be higher. Wage roles are shout the same, if Iringe benefits are included. But Germon workers are on the job 230 days per year; Americans about 260.

2. Transportation costs will be reduced since the cora need not move from Wolfsburg or other German eltles to the sea and across the Atlantic

3. VW hopes to huy some automotive parts inr the new plant cheaper in the U.S. Mr. von Schenck mentioned as possitillities spark plugs, generators, tires, and sealed-heam head-

VW hopee its closer connection with the U.S. will help it belter meet both the competition and government require-

"The U.S. has the most edvanced safety regulations and antipoliution requirements," notes the quiet-spoken markoling inunager. "If you ore able to compete in the U.S. under theeo circumstances, you are able to compete onywhere in tho

If all goes well, VW hopes to stort assembling VW Rabbit models there at the end of 1977. Copacity production of 200,000 cors per year by 9,900 persons will not be reached for enother

Other VW models will continue to be shtpped from Ger-

One risk in establishing an American VV plant is that e shift In exchange rates between the dollar and the West German mark might once more make Germen production highly ad-

are experiencing similar inflation rates, a dramatic change in exchange rates is considered unlikely.

Another concern is that the U.S. plant might produce a lower quality car. But Mr. von Schenek said that a quality control crew will be shipped over from here to supervise production. Volkswagen union officials have also been speaking with officials of the United Automobile Workers union about employee questions and production conditions. Employees' representativea here, once reluctant to see a plant established in the U.S., are now keen to have it a success.

#### High prices cited

"Our position will be better in the U.S.," said Siegfried Ehters, chairman of the worker-elected general works council here. Sounding much like management, he edded, "We heve too high prices in reletion to the compelition.

On a worldwide basis, economic recovery has given VW a substantiol anies and financiat hoost. The company made a profit of 500 million DM (\$190 million) in the first half of 1976. tost year the VW group tost 157 million DM.

Mr. von Schenck characterizea sales of the VW group as "extremely good to good" in Germany, "good to fair" lo the remainder of Western Europe, end "foir to bad" in the U.S.

American sales have declined more than 40 percent to 120,000 units in the first helf. Mr. von Schenck explaine that competition from cheaper Jepenese cars, especially Honde and Toyota autos, has been aevere.

A related problem ia the expectation of many Americans thet the Volkawagen is an inexpensive cer - not a middlo-class machine. "It will lake us another two years to overcome the old beetle Image," reckona Mr. von Schenck.

## Bargain-hunting in Italy \re otters too protected?

By Logan Beatley Lessons Special to The Christian Science Monitor

The first thing my Irlends who visit Rome ask me is: "Whet time do the stores open in the afternoon?" The second la: "Where are the bargains?"

Until recently i heve been teiling them, "There are no cheep bargains in Italy, only expensive ones," because inexpensive Florentiae change pursea, cooking utenslis, pottery, and such usually cost less at Gimbel's basement in New York (and without the hossle of carrying them home) than at Rinascente, the biggest Italian chein department store. The other two chains, Stande and Upim, offered no significant savings or exciting marchandisa.

So I edvised my friends to save their pennies and invest in more expensive things from the fency leather stores like Fendi, Roberta di Camerino, and Gucci; deluxe shoe stores such as Rafael Salato, Dalcd, and Mario Valentino; and prestigious boutique names like Miasoni, Mirsa, Laura Aponte, Emilio Pucci (especially the cottons), Valentino, and Ken Scott,

Clothes in Italy lilustrate the point just made: there are the beautifully made expensive ciothes of exquisite fabrics, the siyilst inexpensive mass-produced goods made princlpally for export (you cannot buy a Dianc von Furstenburg dress in Italy where they are made), and the cheap end not-so-cheap open air market itams, many of which come apart after a few washings.

However, I made the rounds of the chein stores Rinascente, Standa, and Uplm, which are located all over Italy, end found some

good-looking, well-priced things.

Check the exchange rate daily and try to change at a "cambio" or travel agancy (both perfectly legal) which often give a slightly batter rate than the bank, and remember that even banks will differ. If you are paying a store casbier with traveler's cliecks, be sure to ask at what rate they are caiculating the transaction.

#### A bicentennial story

Characters - o huge dinosour Location - Philadelphio, 1776 Incident - a giant spider web

There once was e dinosaur who oversiept 22,400,000 years. He woke up in the year 1776. When he woke up he found that he was cought in a giant spider web. He was trying to get up, but he couldn't. Finally he had an idee; he would move his tale back end forth to break it.

While he was doing that, Thomes Jefferson end Benjamin Frenklin were signing the Deciaretion of Indapendence. Then the dinoseur got up and sterted to walk to Philadelphia. It was Benjamin Franklin'e turn to sign. Then the independence Hell sterted to sheke.

Benjemin Franklin mede e misteke on his name. He went outside to see what was going on and saw the huge dinoeeur. He was scared elliy, so he went back and told the others. The dinosaur wes very hungry and sterted to look for e swemp. He found a lake which wee good enough for him. Se he drank and drank end went to sleep for ever more.

Bradlay Banson, 10 La Masa, California

Hammond, Indiana

#### Salty the dog

Salty was a funny-looking dog. He hed green and red hair that always stood up, and one of his ears always stood up and one always fell down. All the dog children at school called Salty Sick-Looking Selty. Even Salty's teacher was mean to him because of the wey he looked. She kept him after school for looking bad. Salty only had three friends. Their names were Samantha (Sam for short), Tod, and Tim. Salty, Sam, Tod, and Tim were in a club called The Pals. This week The Pals were trying to get other dogs to like Salty. They had two plens. The first plan was to tell dogs to judge Salty by his character, not his looks. But that did not work because everybody seld how can we judga him by his oberecter if we can't ace it, ell we can ace is his looks and they're awful. So Tha Pals tried Plan Two: Plan Two was for Salty to Invent a woaderful game that ell the dog childreo would like and then when everybody was done playing they would say thet Salty made it up. Pien Two worked. Everybody was amazed that such a bad-looking dog could make up such a good gama end from then on they judged Saity by his character.

#### Running City

In Running City nobody walks.
They run, which keeps the olty running. They run, they run, they run their feet

But they don't care, Shame on them.
I see feet left on the streets.
But they don't care
Litter footbugs.

## A new child star emerges at Olympics

By Larry Eldridge

Sports editor of The Christien Science Monitor

Show biz has upstaged compelition in the 1976 Olympics just as it did four years ago, and once again a pixio-like tecnager has emerged as the

At Munich it was tiny Olga Korbul who leaped lo fame through her unique blend of charm, polse, and child-like vulnerability. This time around || is t4-year-old Nadla Comancel who has won the heerts of the world in almost identical fashion.

The Romanian youngster, who stands just under five feet and weighs only 88 pounds, awed them at the Forum all weak long, electrifying the selloui crowds and bringing them to their feet time and again for stand-

With her dark hair iled back in a beribbonad pony tall, Nadia wes the appealing child audiences everywhere love, and she had the crowd in the palm of hor itsnd from the moment sho stopped onto the floor. Then when sho went into her routines she displayed a combination of strength, skill, body control, and artistry amszing for one of her yaers and size. She was absolutely dazzling - evon reaching an unprecedented perfection, according to the judges, on a number of occasions.

Thus in addition to being by far the best entertainer on the floor, Nadia was also quite probably the best competitor - not that this really would lisve mattered. Olga cerialnly wasn't the best at Munich (you can look it up), but sha is the one they all remember.

The aport involved bere, if anyone really cares, is gymnastics. Very icw people do care, though, as can be readily ascerlained by taking a poll to name any other gymnast who ever competed for any country at

In 1968 at Mcxlco City, for instance, one of the lop stara of the enlire games was a femalo gymnast who won four gold medals in a performance for exceeding that of Korbut four years later. Surely then, anyone intarested in gymnastics as compelition rather than as show businesa would heve her name on the tip of his tongue

Vera Cesiavska?

The ultimate proof that we're talking about something other than

## **David** Frost's dazzling world

New films, Nixon TV interviews - and more

By David Sterritt

New York David Frost has sturted warming up for the "blggest ever" assignment in his TV enreer a scries of unprecedented interviews with former President Richard M. Nixon.

But Frost never does just one thing at a time. So lie is also preparing the American release of his femily-lilin Cinderelle story, "The Slipper and the Rose."

And this while Britisher is beating the drum - or, in his words, "beating the 12-string gultar" - for a new movie about a black American called "Leadbeliy."

Since "Leadbelly" was the most imminent of these events, it formed the first focus of our conversation raceatly in Frost's elegant New York holel suite (complete with Arabien chinaware on the coffee table). Frost served as execulive producer of the film, and couldn't be more "proud to be associated will it.

"It's a triumphant atory of how one man atayed his own man in the most solverse of circumsiances," explains the enthusiastic edvocate. "As [director] Gordon Parks says, it's a that.

Mr. Frosi

musical version of 'Sounder,' not a musicot version of 'Mandingo.'

"It seemed to me to be a terrific atory, this incredible contrapuntal thing of a man on the chain gang for murder twice, yet atlil relaining the sensitivity to create and develop such songs as 'Good Night irene' and 'Midnight Special' end ali the others. . . .

"Leadbelly is an American legend and a legend for all Americans. He has been a formetive influence on everybody from Pete Sesger to Bob Dylen, and Mick Jagger was telling me the other day how influenced he wea by Leadbelly's music. But he basn't yet achieved ibe

Frosi earnestly tells me that "Leadbelly" all, demanding look back at his life; was "the only picture to get a standing ovation never do unything like this again, and at the Dallas Film Festival," and notes that then try to build a new life. ## Carter : quel genre de président serait-il ?

par John Dillin Correspondent du Christian Scienco Monitor

Atlenta Jimmy Carter serait un président opiniâtre, travailleur, innovateur, qui se batirait confre le Congrès, ou quiconque résisteralt à son programme.

Ce point de vue d'une présidence éventuelle Certer rassort de douzaines d'interviews evec des politiciens de Géorgie, des fonctionneires, des emis et des collègues qui le conneissent bien.

· Co sere un président très actif », dit Zell Miller, la sous-gouverneur de Géorgie, qui a trevoillé en étroite collaboration avec M. Carter au Sènet de commandent de sous-marin ». Sa msin ssisit fermement les commendes. Il s'attribue une position de » prise en chesses a vis à vis du corre l'égislatif de cet Elat dons le parti democrate.

» C'est un homme extrêmement combalif, un homme très obstiné. Quand il présente un programme qui est, d'après lui, le meilieur possible... Il soulèvera des montagnes pour ic faire

Ccux qui ic conneissent le mieux disent qu'un mandat présidentiel de Carter comporterait probablement :

• De l'opiniatreté et de la ténacité qui fereient de lui l'un des chefs d'étet les plus intransigeants depuis plusieure

 Un président trevailleur qui commencereit à a'occuper des affaires officiellee dea 7 h. 15 du matin et ne ferait une pause que pour menger un sandwich (en général du fromaga au piment et du pein complet) et boire une boisson non alcoolisée pour son déjeuner.

• La critique acerbe du piston, des projets qui sont créès de toute plèce, ierament de ceux qui ont leur origine dans le corps d'armée du Gènie de l'armée américaine.

de l'environnement

 Une approche dure, le réduction à ss plus simple expression du budget de lo défense nationale ; le réduction du nombre des généraux et des emiraux.

• De nombreux postes èlevés seraient

donnés aux noirs. • Une insistence plus grende que prévue sur les affaires étrangères, où il ferait tous ses efforts pour renforcer ies alliances avec l'Europe et le Japon.

• Un désir de laisser le souvenir d'un président décidé à la menière da

Herry Truman. L'ex-officier da marine Carter adopte pour sa façon de gouverner un abord charge · vis-à-vis du corpa législetif, des membres du cabinet et des bureau-

En tant qua gouverneur, M. Carter prenalt bien conseil, disent sea collègues, meis ii restalt lui-méme — avec son propre sentiment de direction et de but. » Il ne merchenderait paa le vrai

principe » dit M. Bolton. En tent que gouverneur, heaucoup de législeteure et de simples citoyens éprouvaient un ressentiment amer contre M. Carter - et certains pensent que cela pourrait arriver de nouveau s'il devenait président.

M. Carter fit une campagne plutôt conservetrice pour le poste de gouverneur. Il sollicite les électeurs de George Wallace. (Il lui aureit été impossible de remporter la victoire sana eux.)

Un choc ondulatoire belaya toute ia Géorgle quand le gouverneur Certer, nouvellement élu, sembla feire un revirement. Dans son discours d'ineuguration il dit :

« Je voua le dis tout à fait franchement, le tempa de la diacrimination • Le soutien ferme das programmes raciele est révolu... Aueun pauvre, de l'environnement... paysan, faible ou noir ne devrait jamels avoir à porter le fardeau additionnel eur le fait que leur sénsteur entre d'étre privé de l'occasion de recevoir une éducation, un emploi ou la simple justice. »

Puis M. Carter monta sur la législature de la Géorgie comme un cowboy texsn sur un destrier. Au lieu d'un coup de coude lci, d'un comproinis per là --- comme les gouverneurs qui l'aveient prècédé — il piqua des éperons et sembla presque jouir de la

Les exemples de positions prises sans compromis sont nombreux.

tion requise était que le père du sénateur recolve une promotion relativement lnaignifiante dans la voierie.

I. Carter refusa Le sénateur Julian Bond, un critique de Certer, dit :

• Il n'obtint pas le genre de plan de réorganisation qu'il souhaitait à cause de son attitude. C'était : "Comme je l'entends, ou rien. Comme je l'entends, ou pae du tout."

 Ce sereit ie genre de gars qui vous convoque à son bureau, presque avec arrogance, et dit : "Voici. C'est ce que j'ai. Faites ceci." Et on répond : "C'est une voie à deux sens — vous donnez et vous recevez." Ii n'aimait pos

Considérans brièvement ces quatre • Jimmy est obstiné d'une questions particulières à la lumière de la intelligente — non de façon in Scienco Chréticage : qu'est-ce que les autree pensent de nous, quels sont les rup-

commencez par la compreniste le l'étudiant de la Science l'hrétienne, était énergique dans ses instructions sur le manière de réagir envers ceux qui ne nous alment pas. Rien ne peut être plus clair que utilisé sa eignoture comme un système ses paroles : « Bénissez ceux qui vous meudissent, falics du blen à ceux qui vous Malgré son succès fselle lors de la haïssent, et priez pour ceux qui vous maiconvention démocratique, de grant traitent el qui vous persécutent. L' Et

Msry Baker Eddy, qui a découvert et fendé la Science l'hrétienne et ilont l'œuvre de vie a été d'alder les autres à sulvre la voie du maltre Chrétien, a écrit : » Notre amour pour nos ennemis duit être

lout à fait le même que celui que nous avons pour nos amis. » Comment est-il possible de suivre litté-

ralement de telles Instructions ? C'est possible parce que, comme cela est clairement impliqué par les œuvres de Jésus et que la Science Chrétienne le rend explicite, l'honime est ce que le premier chspitre de la Bibic dit qu'il est : l'imege ct la ressembisnee de Dieu. La holne, la vengeance, les mauvaises actions, i'antipathle, les abus ne esractérisent pas le reflet de Dieu. Ils sont irréels et apparulssent sur la scène humaine connue de simples appraences que nous uvans tout droit de rejeter cumme insubstantielles. Quand nous rejetterens vralment l'apparence et accepterons ce qui est spirituellement réel, nous nous trauverons en train d'être nimés et d'almer sons effurt. Si le message dit : » C'est un ennemi », nous aglrons du point de vue de la compréhension, non à partir de la simple apparence, el noire résction sere en accord avec ce que nous sevons étre spirituellement vrai, non evec ce que nous pouvons voir physique

L'homme, en tant que ressemblance de

Dicu, on reflet spirituel, est hien portant,

Dieu se dérouler au sein de Son royaunie. Si le message dit qu'il y a un lemps pour que le blen se manifeste et un temps pendant leguel nous ne devons pas nous attendre à beaucoup de bien, nous pouvons réagir en partant du point de vue que lout le bien de Dieu est à portée de la mein, lei ct maintenant, qu'il n'augmente ni ne diminue jamals sulvant le temps, l'heure ou le calendrier. Alors nous pourrons œuvrer avec jole pour découvrir ce blen, en jouir, élorgir notre vision du blen et celle des autres et faire les pas qui condulsent à sa

démonstration dans les effetres humaines. Réagir justement à tout message ou à toute situation qui se prèsente et voudrait sembler nous limiter, c'est percevoir l'emour, le blen-être, les ressources et l'utilité qui sont inhérents à notre nature spiritucile. C'est einsi que nons irouvons la

It was a great life for a child especially holidays on a farm. Winter ones, too, for I nating place at any seeson of the year - even when we were snowed in during a storin and had to live off our humps for weeks.

We never starved, for we kept eecks of meal end flour in big hine in the kitchen, and hed plenty of cheese and eggs. It was the little extras we missed, as well as human contact with the outside world; end I was alweys glad when the men yoked one of the Clydesdales into the snowplough and opened up the farm road so thel the vanman, tho postle, end the butcher could visit ue again.

The only trouble was I had no excuse for staying away from the village school where I was e Mixed Infent. I had to welk the two tilly miles there end back, and learned a lot of my higher education from the folk I met on the way. The gamekeeper, the roadman, and the gypsies who sometimes gave me e lift in their ceravans driven by plebald

The farm was tucked away from the main road on the Scottish elde of the Cheviot hills. It had been a battlefield in the old deys when the English and Scots were enemies. The ruins of an old Border Keep stood on our hili, and it was there I pleyed houses, watching the horizon to see if the foe was creeping across; but I saw nothing more warlike than the baker and his horsa. And at echool I made friends with a little English girl from over the Border, end was surprised when I went to visit her to find that the cowe in Northumberland had four legs, just like ours,

and that heather could grow on foreign soil. In those days I knew more animals than buman bolngs. Indeed, the only crowd I ever sew wes a flock of sheep. They all looked the same to mo, but Jock-the-herd knew the difference. I somellmes followed him around the hirsel, acting ee a kind of essistent-shepherdess, though Jock often told me I wes more hindrance than belp. It was Jed and

The Monitor's raligious article

## The right response

Someone tells us or shows us that he epproves or disapproves of what we do; our body reports its state to us - tells us we are well or sick; our bank balance puts in its word that we have enough funds or that we beven't: even the clock tells us when to dn this or that. Hut the real and important issue is not the messages we receive but how we respond to them!

Consider briefly these four perlicular issnes in the light of Christien Science — whot others think of us, what our body reports, whet our bank balance tells us, end our concept of time.

Christ Jesus, the ultimate guide for the sludent of Christien Science, wee emphatic in his instructions on how to respond to those who do not like us. Nothing could be clearer than his words, "Bless them that curse you, do good to them that hete you, and pray for them which despitefully use you, and persecute you." And Mary Baker Eddy, who discovered and founded Christian Science, and whose thework was helping others to follow in the way of the master Christian, writes, "We must love our enemlos in all the manifestations wherein and whereby we love our friends."\*\*

How le it possible to follow titerally euch instructions? It is possible beceuse, as Jesua cleerly implied and Christian Science makes explicit, meo is what the first chapter of the Bible saye he is: the image and likeness of God. Hatred, revenge, wrongdoing, dislike, misuse, era not cheracteristic of God's raflection. They ere unreal and appear on the human scene as mere oppearancea that wo have every right to reject as insubstential. When we do reject the appearance and eccept the spiritually real, we will find ourselvee effortlessly loving and also belog loved. If the message says "enemy" we will act from the standpoint of understanding, not of mere appearance, and our response will be In accord with what we know to be spiritually true, not with what we mey see physically.

Mon es God's likeness, or epiritual reflection, is well, not sick. He reflects the order. harmony, and perfection of hia Fether-Mother God. The student of Christlan Science has found by experience that to the extent ho undersiends and rejoices in his spiritual atetue, whatever is wrong physically is corrected in the most practical and raalistic mannor. The written testimonies of healing in the Christian Scienco periodicels end their verbal counterparts at Wodnesday evening services in Christian Science churches can be convincing ovidence to the inquirer that this ls true,

The same holds true in relation to our fi-nancial state. Jesus said. "Consider the lilles of the field, how they grow; they toti not, netarrayed like one of these." | Man, ee God's image, reflects the nature of his infinitely good source. We may need to work for our daily bread; but since good is olready ours as the spiritual children of God, our response to need is not to try to create good for ourselves or others but to demonstrate the good that is 'already spiritually at hand. This takes the toll out of our work and brings us the joy of unfoldment within the realm of God's goodness:

If the message is that there is a time for good things to happen and a time when we cannot expect much good, we can respond

tine way or another we are constantly re- from the stondpoint that all of God's good is reiving messages from the world around us. at hand, here and now, never increased nor decreased by time or clock or celendar. Then we can delightfully labor to discover that good, enjoy it, enlarge our end others' vlow of it, and to take the steps that lead to the demonstration of it in human effairs.

To respond rightly to any message or situutim that comes to us and that would appear to limit us is to perceive the love, the wellbeing, the supply, and usefulness that ere inherent in our spirttual nature. Here is found the joy of living.

\*Malthew 5:44: \*\*Miscellaneous Writings, p. II; †Matthew 6:28, 29,

# The feeling that God can heal you

Men and women everywhere feel deep down that it's true. God can heal. With the power of Spirit. Without drugs.

Jesus knew this. He proved it, and so did his early followers. They turned to God in prayer. They yielded to the understanding of God's presence and grace.

You can do the same, and there is a book that can help you. Study of Science and Health with Key to the Scriptures by Mary Baker Eddy reveals new meaning in Jesus' teachings. You can learn the rules of spiritual healing he taught and lived.

You can order a copy of this book by using the coupon below.

## Some people have to draw a picture for you

Now is the time when Americans welt more and more inpatiently to teern who their next president will be. For certooniats the suapensa comes down to queations like this: Witl it be Jimmy Carter's teeth they'll heve to draw for the coming four yeers? Or Ronald Reagao's pompadour-in-profile. Or more of that earnest, slightly apprehensive Ford expression that one cartoonist hes compared to the look on the face of the first farmer to see the inveders from outer speca in a grade B actence-

Does enybody reelly know whel a president is like untti ona's favorite cartoonist has drewn hlm - as Presi-

Cartooning is a marvelous method for reducing offices lo human beings, and when it works, it can be as much a part of the democratic process as e batlot box. In fact, the political cartoon in Americe considerably predates the prosidency, extending back to 1747 and Benjamin Franklin, Franklin's famous version of the coloniae es e subdivided snake with the caption, "Jola or Die," must renk as one of the most effective cartoons in American

Like all artists, e cartoonist is a bow in seerch of a bullseye. How Thomas Nest, perhapa America'a best cartoonist, would have loved Watergatai Instead tha man who invented the Republicon alaphent-symbol in 1874 had Tammeny Hell and "Boss" Twaed to himself. As much as any individual, Nast put the Tweed ring, with tis bribes and pay-offs, out of the dirty-tricke husi-ness. And Tweed knew it, "I don't eare so much what

Melvin Maddocks

the pepers write about me," the Boss seld. "My coualtuents can't read. But they cen see picturea."

Spectators who taka carlooning as a blood-sport are likely to cry out to the cartoonist in behalf of a victim: "Poor man! What right have you to do those awful things to his face? How do you think his mother will

Presumebly neither tha Egyptian king ikhnaton nor hia mother would heve been overly flattored by the cortoon drawn on his tomb in 1380 B.C. Nor would the Romen soldier have been promoted for cleverly carlesturing his commanding officer on e mamoreble wall of Pompali. But it is surprising how meny tergets heve enjoyed tha game, from Lincoln to Franklin D. Roosavell – and thet other Roosevelt, Thaodore, possibly the most certooned president of all, whose teeth were world-renowned long before Jimmy Cerier was born.

Furthermore, cartoonists seem to delight in certooning themselves. Nast and Honoré Daumler, maybe the best cartoonist of all time, era notable exempleo. An ambivalent fondness axists between the cartooniat

end his subject. Ha may well faal great sffection for the nose he lengthens - and langthens and lengthens. There is genuina regret in the cartoonist Otiver Herford's

I'm sorry Willen Taft is out Of Politics; without o doubt Of all the Presidential erew He was the easlest to do.

Are there subjects which should be regarded as only boundo, as sucred? Daumler, like his covel-facing friend Belzac, regorded the "Human Comedy" as his limited territory. Deumior wes imprisoned aix mosts t832 for carleaturing the King, Lauis Philippe. Evaller that he did not - probably could not - dealst.

In 1899 the Collfornin legislature practically outlered carlooning by passing a bill that no drowing could & permitted which "reflected upon e person's character," nor could any portraiture he made public without the consent of the subject. Life being what it is, the bill had to be hastly repealed to allow the entertainment of ite humen race - even ni its own expense - to go on.

Thoro is something purifying about e good cartoon it may puncture pomposity; it connot hurt dignily. Il de Geullo could survive the oesaults of a lhousand pens to his nose and Churchiti could triumph over all those w. sions of the wrinkled chorub, there is little case for " suing exemptions to others.

Martin Lulher was en amataur cartoonist, end there is e Protestant attitude to cartooning - an insistence the equal humanity of all men, regardless of atsilons status. Out of the very excesses of a good carton comea e finel sense of proportion - of sanity. So last the cartoonists loose, we say. The face we're Inch isughing at is not Ford'o, Reagen'e, or Carter's but M.

## Lebanon: the way out

position of those parties to the conflict which had earlier agreed under pressure to reckon with the new realities of the country.

Bloody and destructive though it had been, this internal war at least made imperative the need for a basic change in Lebanon's political organization. With the Syrian regime casting in its lot with the conservetive Lebanese factions, this bope for a constitutional change has all but ovaporeted for the time being.

The first urgent step now ts for the Syrlan Army to withdraw from Lebanon and lat the internal conflict teke its own course, unhindered hy any outside intervention. This also means e reversal in Washington's policy based on the recommendations of Dean Brown, the American apecial envoy in Lehanon thia apring, who once thought that "the Syrians would do the job quickly and neatly." A close

Even en end of the armed confrontellon, however, would not mean an end to the circumstances that led to it in the first place.

Whether the labela foisted by the American news media on the different protagonists in the Lebanese crisis are correct or not, it must be recalled thet at the core of it is the revolt of Lebanon's distranchised majority. Little metter that the Lebanesa "haves" are predominantly Christien, or that the Lebanese "have nots" predominantly Muslim. The Labanese Netional Movement or, eathe media pre-fer to call it, the "leftis Muslim alliance" cannot be seriously characterized along reli-gious lines: it not only includes e sizable number of Christians in its ranks but, more importaot, advocates and works for totally secular
